SUMMARY

Results-oriented Software Engineering Leader with 18 years of experience delivering robust, scalable, and secure solutions in fast-paced, regulatory-driven environments. As a strong advocate for enterprise-first thinking and doing things right, I bring teams together to drive innovative solutions that challenge the status quo and align with long-term organizational goals. Proven track record of leading cross-functional teams through the entire project lifecycle, making strategic decisions, managing team dynamics, and ensuring adherence to industry standards.

PROFESSIONAL EXPERIENCE

Senior Engineer, American Express, Phoenix

➔ **Value Stream Engineering** | 2022 – Present

- Partnered with product stakeholders to analyze third-party platforms, identified key features and drove strategic, enterprise-first design decisions to migrate clients to in-house solutions.
- Led cross-functional teams by creating a shared vision, facilitating open communication, and aligning diverse skill sets to address critical gaps. Ensured a unified approach toward developing scalable, compliant solutions that drove efficiency and met enterprise-wide objectives.
- Led implementation of scalable Identity Access Management (IAM) and multi-factor authentication (MFA) for critical corporate payment and reconciliation platforms, aligning with enterprise security standards to protect sensitive payment data.
- Emphasized "doing it the right way" by addressing OWASP security vulnerabilities, strengthening IAM and MFA for critical platforms, and ensuring long-term scalability.
- Developed certificate renewal automation tool, reducing manual efforts by 90%, achieving zero-expiration incidents, and ensuring compliance with operational and security standards across the platforms.
- Mentored developers and interns on UI/UX best practices, focusing on responsive design, performance optimization, and accessibility standards like WAI-ARIA and WCAG to ensure usability across devices and platforms.

➔ **Commercial User Management Center** | 2018 – 2022

- Spearheaded the design and development of a self-servicing platform, reducing client onboarding time by 30%. Led hands-on coding in React/Redux, HTML/CSS, and integrated role management features to deliver a seamless experience for commercial clients.

Sreedhar Suswaram

(901) 283-7338 / sreedhar.sr@gmail.com

- Collaborated with UX/UI teams to refine design prototypes, ensuring intuitive user interfaces aligned with business goals. Received highly positive feedback from clients during interviews.
- Developed key features of the web application, including user dashboards, demographic updates, and account management functionalities, modern web development practices to ensure high performance and responsiveness.
- Contributed to front-end and back-end integration by implementing RESTful APIs, ensuring seamless data exchange and communication between the UI and backend services for improved system performance and reliability.
- Introduced Redis caching enhancing user experience during peak traffic by reducing response times by 35% for frequently accessed data.
- Conducted code reviews to ensure compliance with industry standards and mentored developers to foster continuous improvement.

➔ **Commercial Payments |** 2013 – 2018

- Drove cross-platform architecture proposal and alignment partnering with the portfolio architect. It resulted in a 2.35M product-funded release strategy.
- Led design and development of four corporate payment products, gaining deep expertise in enterprise application interfacing. Spearheaded creation of a wire and check payment allocation system, optimizing workflows globally.
- Streamlined operations by replacing file-based interfaces with real-time services, boosting system performance, and driving $500K in savings through optimized workflows and scalable solutions.
- Challenging traditional processes, I championed the adoption of Agile methodologies by training and motivating business partners to deliver 500+ user stories, improving ROI across the board.
- Led platform modernization, integrating modern technologies to enhance scalability, maintainability, and performance. Adopted blue-green and canary deployments for critical applications, reducing downtime by 90% and mitigating risks during production updates.
- Integrated with static and dynamic code scanning tools like SonarQube and Aquila to enhance code quality and remediate security vulnerabilities.

Technical Delivery Manager, Verian, SC | 2010 – 2013

- Spearheaded the development of a modern e-Invoicing SaaS solution and transformed the Purchase-to-Pay product into a scalable SaaS offering.
- Consulted with clients to identify business expansion opportunities and aligned with product roadmap, driving value and growth to the company and clients.

Sreedhar Suswaram

(901) 283-7338 / sreedhar.sr@gmail.com

- Developed and presented a data-driven business case that led to creating a client servicing team, fostering a culture of collaboration, and significantly improving production issue resolution times.
- Promoted the adoption of Agile Scrum SDLC within technical teams, championing a shift in mindset and helping to navigate apprehensions.
- Awarded Rookie of the Year for championing a complex application, saving a key client relationship, and challenging established norms to deliver outstanding results.

Senior Developer, Harbor Payments, GA | 2006 – 2010

- Contributed to developing and implementing Java/J2EE-based SaaS solutions that automated accounts payable and receivables platforms.
- Led a $3M migration project, fostering collaboration and addressing challenges to transform legacy systems with modern, scalable solutions.
- Developed end-to-end monitoring strategies for enterprise batch applications, proactively addressing issues and reducing call volume by 30%.

TECHNICAL SKILLS

- Java/J2EE, Spring, Vert.x, React/Redux, HTML, CSS
- DB2, Oracle, MySQL, Couchbase
- Ab Initio, RESTful APIs, Microservices Architecture, Airflow, Spark
- Scrum, SAFe, Rally, Jira, Git, Jenkins, XLRelease
- Static/Dynamic Code Analysis, OWASP, Identity Access Management (IAM), Multi-factor Authentication (MFA)
- Adobe Analytics, WAI-ARIA, WCAG (Web Content Accessibility Guidelines)

EDUCATION & CERTIFICATIONS

- M.S., Electrical and Computers Engineering, University of Memphis
- Harvard Certificate in Leadership Excellence
- SAFe Scrum XP and Scrum Master Certification (CSM)
- Preparing for Leadership – What It Takes to Lead
