Sreedhar Suswaram

(901) 283-7338 | sreedhar.sr@gmail.com

Visionary technology leader with deep expertise in corporate payments, reconciliation, and enterprise architecture. Proven ability to drive digital transformation, lead high-performing engineering teams, and optimize system performance using Java and React-based technologies. Adept at aligning technology with business goals, ensuring scalability, security, and operational excellence. Strong collaborator with Product and UX teams, delivering user-centric, high-impact solutions.

PROFESSIONAL EXPERIENCE

American Express

Senior Engineer, Commercial Reconciliation | 2022 – Present

- Led the design and development of an **MVP migration strategy**, transitioning BTA-Connect clients from a third-party application to an in-house reconciliation platform, ensuring seamless adoption and reducing operational dependencies.
- Spearheaded the implementation of **identity management and multi-factor authentication (MFA)** across reconciliation platforms, enhancing security and regulatory compliance.
- Automated **message signing certificate renewal**, reducing operational effort by **90%** and ensuring continuity in critical payment operations.
- Provided **technical leadership and mentorship**, guiding engineers on best practices, architectural decisions, and modern software development methodologies.
- Championed **data-driven decision-making**, implementing **monitoring and analytics dashboards** to enhance platform observability and uptime.
- Partnered closely with **Product and UX teams** to refine user flows, ensuring an intuitive and seamless user experience across reconciliation tools.

Senior Engineer, Commercial User Management | 2018 – 2022

- Led the development of a **self-service user management portal**, reducing manual interventions and accelerating corporate client onboarding by **30%**.
- Designed and developed a **React/Redux-based UI**, delivering an intuitive and scalable frontend.
- Architected and optimized **RESTful services using Vert.X/Java**, improving user management and transaction processing efficiency.
- Introduced **Redis cache**, reducing response times by **35%**, ensuring high performance during peak loads.
- Integrated **Jaeger distributed tracing**, enhancing microservices observability and reducing debugging times by **40%**.
- Conducted **DR drills**, strengthening platform resilience and ensuring **99.99% system availability**.
- Collaborated with **Product and UX teams** to enhance the UI/UX, improving customer satisfaction and engagement.

Lead Developer, Commercial Payments | 2013 – 2018

- Managed maintenance and enhancements for four corporate payment products, developing expertise in B2B payments, reconciliation, and financial operations.
- Partnered with the portfolio architect to shape a **cross-platform technology roadmap**, securing **$2.35M in product funding** for strategic initiatives.
- Led the transition from **file-based processing to real-time services**, improving performance and achieving **$500K in annual cost savings**.

- Implemented **agile transformation initiatives**, reducing project delivery timelines by **15%** and increasing development velocity.
- Enhanced **incident response strategies using Splunk**, reducing **Mean Time to Resolution (MTTR) by 40%** through proactive monitoring and anomaly detection.
- Designed and implemented **blue-green and canary deployments**, reducing downtime by **90%** while ensuring seamless rollouts.
- Mentored engineers at all levels, playing a pivotal role in talent development and succession planning.
- Worked closely with **UX and Product teams** to streamline the end-to-end payment experience, enhancing usability and efficiency.

Verian
Technical Delivery Manager | 2010 – 2013
- Led the development of a **cloud-based e-Invoicing SaaS solution**, enabling enterprises to automate invoicing and payments, driving operational efficiencies.
- Transformed the **Purchase-to-Pay product into a SaaS platform**, increasing customer adoption and revenue streams.
- Proposed and launched a **client servicing team**, reducing issue resolution times and boosting **CSAT scores by 25%** in three months.
- Championed **Agile and DevOps best practices**, implementing CI/CD pipelines, reducing deployment cycles, and improving time-to-market.
- Awarded **Rookie of the Year** for successfully leading a high-stakes application revamp, securing key client accounts, and driving process improvements.

Harbor Payments
Senior Developer | 2006 – 2010
- Developed and deployed **Java/J2EE-based SaaS solutions**, automating financial workflows for corporate clients.
- Led a **$3M enterprise migration project**, transitioning from **Mercator to Informatica PowerCenter**, modernizing data transformation and reconciliation capabilities.
- Designed **end-to-end monitoring and alerting strategies**, reducing production escalations and cutting support call volume by **30%**.

KEY SKILLS & TECHNOLOGIES

- **Technology Leadership & Strategy:** Digital transformation, cross-functional collaboration, enterprise architecture
- **Enterprise Payment Systems:** B2B payments, reconciliation, financial transactions, compliance
- **Software Development:** Java, Spring Boot, React, Node.js, Vert.X, API development
- **Cloud & Infrastructure:** Microservices, REST APIs, Kubernetes, Redis, AWS
- **Observability & Performance Optimization:** Jaeger, Splunk, Distributed Tracing, APM tools
- **Security & Governance:** Identity and access management, MFA, RBAC, API security standards
- **Agile & DevOps:** CI/CD, Blue-Green Deployments, SRE best practices
- **Data Engineering & Analytics:** Data processing, transformation, predictive monitoring
- **Product & UX Collaboration:** User-centric design, customer experience enhancement, cross-functional teamwork

EDUCATION & CERTIFICATIONS

- **M.S., Electrical and Computer Engineering** – University of Memphis
- **Harvard Certificate in Leadership Excellence**
- **SAFe Scrum XP and Certified Scrum Master (CSM)**
- **AWS Certified Solutions Architect (Planned)**

LEADERSHIP & ACHIEVEMENTS

- Successfully drove enterprise **cost-saving initiatives totaling $500K** through workflow and infrastructure optimizations.
- Designed and implemented a **centralized authorization module**, streamlining user access and enhancing security posture.
- Spearheaded a **data-driven reconciliation analysis**, aligning product strategy with business objectives.
- Mentored and coached **cross-functional teams and emerging leaders**, fostering a culture of technical excellence and continuous learning.
- Strengthened relationships with **Product and UX teams**, ensuring that engineering solutions align with user needs and business objectives.
