Sreedhar Suswaram

(901) 283-7338 | sreedhar.sr@gmail.com

Strategic and customer-focused leader with a deep understanding of corporate payments, reconciliation, and enterprise platforms. Proven ability to drive **product innovation, go-to-market strategy, and user adoption** while aligning technology with business objectives. Adept at leading **cross-functional teams, defining roadmaps, and optimizing product performance** to enhance customer experience and operational efficiency.

PROFESSIONAL EXPERIENCE

American Express

Senior Engineer, Commercial Reconciliation | 2022 – Present

- **Partnered with Product owner in** defining and executing the **product roadmap** for the migration of BTA-Connect clients to an in-house reconciliation platform, ensuring seamless transition and improved user experience.
- Led the development and implementation of **identity management and multi-factor authentication (MFA)** features, enhancing security and compliance.
- Automated operational workflows, reducing manual intervention by 90%, improving scalability and efficiency.
- **Partnered with engineering, UX, and operations teams** to refine user journeys, ensuring a seamless reconciliation experience.
- Leveraged **data analytics and monitoring dashboards** to optimize platform performance and inform product decisions.
- Collaborated with senior leadership to **align product goals with business priorities**, influencing prioritization decisions and resource allocation.

Senior Engineer, Commercial User Management | 2018 – 2022

- Spearheaded the launch of a **self-service user management portal**, reducing manual onboarding efforts by 30% and improving customer satisfaction.
- Led **user research and feedback sessions** to drive product enhancements, resulting in increased adoption and engagement.
- Defined and prioritized **feature requirements**, collaborating with engineering teams to implement scalable solutions.
- Introduced **real-time user analytics and performance tracking**, driving data-driven decision-making and iterative improvements.
- **Owned the end-to-end user experience**, ensuring product-market fit and alignment with customer needs.

Lead Developer, Commercial Payments | 2013 – 2018

- Led **product lifecycle management and enhancements** for four corporate payment products, driving strategic improvements in **B2B payments, reconciliation, and financial operations**.
- Partnered with the portfolio architect to **define a cross-platform product strategy**, securing $2.35M in funding for key initiatives.
- Spearheaded the transition from **file-based processing to real-time payment services**, improving performance and achieving $500K in annual cost savings.

- Drove **agile transformation initiatives**, optimizing workflows to reduce project delivery timelines by 15% and increase development velocity.
- Improved **incident response strategies using Splunk**, reducing Mean Time to Resolution (MTTR) by 40% through proactive monitoring and anomaly detection.
- Launched **blue-green and canary deployment strategies**, minimizing downtime by 90% while ensuring seamless feature rollouts.
- Championed **cross-functional collaboration**, mentoring teams and aligning product development with customer needs.
- Worked closely with **UX and Product teams** to enhance the **end-to-end payment experience**, driving higher usability and efficiency.

Verian
Technical Delivery Manager | 2010 – 2013
- Led the development of a **cloud-based e-Invoicing SaaS solution**, enabling enterprises to automate invoicing and payments, driving operational efficiencies.
- Transformed the **Purchase-to-Pay product into a SaaS platform**, increasing customer adoption and revenue streams.
- Proposed and launched a **client servicing team**, reducing issue resolution times and boosting **CSAT scores by 25%** in three months.
- Championed **Agile and DevOps best practices**, implementing CI/CD pipelines, reducing deployment cycles, and improving time-to-market.
- Awarded **Rookie of the Year** for successfully leading a high-stakes application revamp, securing key client accounts, and driving process improvements.

Harbor Payments
Senior Developer | 2006 – 2010
- Developed and deployed **Java/J2EE-based SaaS solutions**, automating financial workflows for corporate clients.
- Led a **$3M enterprise migration project**, transitioning from **Mercator to Informatica PowerCenter**, modernizing data transformation and reconciliation capabilities.
- Designed **end-to-end monitoring and alerting strategies**, reducing production escalations and cutting support call volume by **30%**.

KEY SKILLS & COMPETENCIES

- **Technology Leadership, Strategy & Roadmap Development**
- **Digital Payments & Reconciliation**
- **User-Centered Design & UX Optimization**
- **Data-Driven Decision Making & KPIs**
- **Stakeholder Management & Cross-Functional Leadership**
- **Agile Product Development & Execution**
- **Market Analysis & Customer Insights**
- **Security & Compliance in Financial Products**

EDUCATION & CERTIFICATIONS

- **M.S., Electrical and Computer Engineering** – University of Memphis

- **Harvard Certificate in Leadership Excellence**
- **SAFe Scrum XP and Certified Scrum Master (CSM)**

LEADERSHIP & ACHIEVEMENTS

- Successfully launched **enterprise reconciliation products**, enhancing user experience and driving adoption.
- Championed **data-driven decision-making**, leveraging analytics to improve product performance and scalability.
- Strengthened relationships with **engineering, UX, and business teams**, ensuring that product strategies align with customer needs and market opportunities.
- Mentored and coached **emerging product leaders**, fostering a culture of innovation and continuous learning.
